

EPST-preparation (phase 2)

Get ready with SimFlying's EPST simulator preparation course. SimFlying has many years of experience in preparing the second phase of the EPST selection procedure. The sessions will be given by our instructors, who are also former EPST students.

Preparatory program (4 hours)

- Basic theory: Principles of flying an aircraft
 - Cockpit familiarization: focused on Primary Flight Display (PFD), Control Wheel and Throttle Quadrant
 - General handling principles: pitch and power
 - Instrument scanning techniques
- 3 hours of training in our B737NG simulator
- De-briefing including tips and tricks

Cost: €225 and 20% discount on your follow-up training.

Refresher course (2 hours)

- Briefing, including focus points on your selection program
- 1 hour of refresher training in our B737NG simulator
- De-briefing including tips and tricks

Cost: €150 and 20% discount on your follow-up training.

What does EPST want to see?

- Ability to keep constant values on the PFD. This includes: pitch angle, bank angle, speed, altitude and vertical speed.
- Spare mental capacity to answer questions or perform mental calculations while flying
- Decisiveness when a choice needs to be made and setting clear priorities
- Perseverance to fly exactly the values asked.
- Improvement in performance
